

AGAPI DAYS II

LAB KARI ASTALA

Instituto de Ciencias Matemáticas - Aula Naranja
May 3-4, 2018

Thursday May 3th

12:00. **Kari Astala** (Aalto University). "Liquid domains, frozen boundaries and the Beltrami equation".

16:00. **Peter Haissinki** (Institut de Mathématiques de Marseille). "Planar quasiconformal mappings and equilateral triangles"

17:00. **Lauri Hitruhin** (University of Helsinki). "Joint rotational and stretching multifractal spectra of homeomorphisms with integrable distortion".

Friday May 4th

10:30. **Colin Guillarmou** (Université Paris-Sud). TBA

11:45. **David Dos Santos Ferreira** (Université de Lorraine). "On the linearized anisotropic Calderón problem".

13:00. **Tobias H. Colding** (MIT). TBA
